

AHMAD S.

Full-Stack Software Engineer | AI & SaaS Developer

Johor Bahru, Malaysia | contact@ahmad.ovh | [Github](#) | [Linkedin](#) | [Portfolio](#)

Education

Universiti Teknologi Malaysia — B.Sc. Software Engineering (Hons.) |

Ongoing | Expected Graduation 2029 |

Saudi General Secondary Certificate (High School) — 100% |

Graduated 2025 | Equivalent GPA: 5.0/5.0 |

Experience

[Pagify.me \(Portify\)](#) — Founder & Full-Stack Developer | 2025–Present

- Built an AI-powered SaaS platform generating fully unique, single-file portfolio websites in under 3 minutes.
- Designed automated pipelines transforming user input into professional layouts with instant deployment and custom domains.
- Delivered responsive, cross-platform websites optimized for desktop and mobile.
- **Impact:** Enabled 500+ users to launch professional websites instantly without coding experience.

Rantable — Full-Stack Developer | 2025–Present

- Automated short-form content production farm with AI-generated scripts, synthesized TTS voiceovers, dynamic subtitles, and sound effects.
- Integrated LLMs with JSON-based scripting for scalable and automated content creation.
- **Impact:** Created a platform allowing instant production of professional-quality Roblox videos.

RuralCare Platform — Backend Developer | 2025

- Developed an AI-powered platform for patients to input symptoms for preliminary diagnoses and care guidance.
- Built dashboards, alerts, and recommendations to help users track health and seek professional care.
- **Impact:** Improved access to healthcare guidance for rural and underserved communities, reaching 6000+ users within 48 hours of release. **Rolled Host** — Systems Architect & Sysadmin | 2020–2023
- Managed infrastructure for ~2,000 active users, handling server deployments, monitoring, and automation workflows.
- Automated tasks with Node.js, Docker, PM2, and WebSocket pipelines.
- **Impact:** Maintained 99.9% uptime and reliable performance for hosting operations.

Technical Skills

Core Web & SaaS: JavaScript, TypeScript, Node.js, React Native, Expo, Next.js, HTML/CSS, TailwindCSS, SQL, PostgreSQL, MongoDB, Mongoose, REST APIs, Express.JS, WebSockets, JSON Schema, Regex

AI & Automation: AI-assisted workflows, LLM integration, automated pipelines

DevOps & Tools: Docker, PM2, VS Code, GitHub, Postman, ngrok, Netlify, Vercel, Electron

Game & Hardware: Unity, Godot, Pygame, Phaser.js, Arduino, ESP32

Design & Media: Blender, Figma, Aseprite/Libresprite

Achievements & Competitions

- **1st Place, Polaris MicroHacks:** Built Modularis, an AI-powered Discord bot generating and activating commands from natural language in real-time.
- **Hack the North & Cave Protocol CTF:** Participated in cryptography, digital forensics, and problem-solving challenges.
- Built multiple AI-driven SaaS tools from scratch, demonstrating full end-to-end system ownership and rapid prototyping skills.
